

Blue Dream Auto

What Cannabis Dreams Are Made Of.

- **Extremely productive.** Expect up to 600gr/m2 of buds that will be glistening in trichomes.
- **A monstrous Sativa.** Being approx. 75% Sativa, this plant will grow up to 110cm with an insanely long main cola and side branches.
- **Ideal for commercial growers.** A great choice for those looking for potent and high-yielding plants that produce exquisite resin.
- **Unique bag-appeal.** The buds boast a beautiful mix of green and purple hues with thick orange pistils.
- **Guess the terps!** The delicious tropical terps with floral hints will keep you guessing at every puff.

A Sativa-dominant, monster producing autoflower that's a breeze to grow. Quick growth and yields of massive sized buds of fruity and floral sweet, citrus, pine, orange, and berry terps give this strain its well-deserved great reputation. Blue Dream Auto will be ready to harvest between 9-11 weeks, producing THC rich flowers that have tested at 22% THC. Thanks to her heavy yields, this hybrid is ideal for commercial growers in search of high potent, large yielding automatics. She will also produce a large amount of top quality sugar leaf meaning extractors can prepare the trimming nets in advance. A very aromatic and fragrant strain that is best suited for beginners who want to try a Sativa-dominant hybrid.

Bud description

Bulky and long appearance, with a light feel. The calyx bulge out resulting in pointy buds, glistening with trichomes. Up close, the buds are a mixture of green, purple, and thick orange hairs, and are packed together in a flurry of color. Extremely sweet-smelling and mouth-watering.

Smoke report

Thanks to her whopping 22% THC, her effects are powerful, upbeat, and energetic. Physical effects are light but together compliment the cerebral effects nicely. A wonderful flower to start the day with, enjoy socially with friends, long walks in nature, sunny days at the beach, musicians, artists, and for enhancing your inner creativity.

Plant Appearance

Being around 75% Sativa dominant, she will grow at a fast pace, throwing out a large number of side branches. Her leaves will be thin and long, and she can develop into a bushy plant in almost no time at all. Branches will grow quite thin, typical of Sativa plants, and when flowering commences can grow to a height of 110cm. A very productive autoflowering hybrid that is able to produce harvests of 450-600gr/m2, making her ideal for commercial growers. Once Blue Dream ´matic is ready to harvest, she will be completely full of shimmering, resin drenched nugs that bulge from every site on the plant.

Grow Tips

She loves frequent watering and can take a heavy nutrient solution, with no issues at all. We advise training Blue Dream Auto out on the first 3-4 weeks, to open up the canopy as much as possible. Some minimal L.S.T will increase the amount of light that the tops will receive. Preparing a bamboo trellis, net or tomato cage is a great way to support the large buds, and prevent them from falling over with excess weight. By pruning the lower parts of the plant before blooming begins, will increase the amount of energy the plants used on its top buds, and ensure that there will be no unwanted popcorn buds forming. She can take more patience to trim, however, produces a high amount of sugar leaf, meaning hash makers will get some incredible returns after trimming.

Flavor

A very delightful fruity and floral flavor, with hints of ripe cherry, orange, citrus, and pine flavors with fruit tart mixed in. Smooth and tropical terps that will keep the palette guessing after every puff. Great to share with friends as it's a truly tasty strain that anyone would enjoy.
